## SUMMARY

I am a detail-oriented front-end web developer that continually strives to build high-quality products. I have project experience with HTML, CSS, and Javascript. My past work experience in luxury hotels enabled me to have excellent time management skills, the ability to multitask, and thrive under pressure. I am also a strong team player, having previously worked in 20+ person teams. I strongly believe in collaborating with a diversified group to achieve big goals while enjoying the process along the way.

## SKILLS

- HTML
- CSS
- Javascript
- React
- Git
